H_neg_C_pos
GO Biological Process
glycoprotein metabolic process
endoplasmic reticulum mannose trimming
protein demannosylation
protein alpha−1,2−demannosylation
protein deglycosylation
glycoprotein biosynthetic process
glycolipid metabolic process
liposaccharide metabolic process
response to endoplasmic reticulum stress
intracellular monoatomic cation homeostasis
cell−cell junction organization
leukocyte migration
regulation of leukocyte migration
blood vessel development
positive regulation of locomotion
blood vessel morphogenesis
positive regulation of cell motility
regulation of mononuclear cell migration
collagen metabolic process
positive regulation of cell migration
myeloid leukocyte migration
plasma membrane bounded cell projection morphogenesis
extracellular matrix organization
extracellular structure organization
external encapsulating structure organization
cell projection morphogenesis
