ribonucleoprotein complex biogenesis
rRNA processing
rRNA metabolic process
antigen processing and presentation of peptide antigen
gen processing and presentation of exogenous antigen
cessing and presentation of exogenous peptide antigen
antigen processing and presentation via MHC class Ib
MHC protein complex assembly
peptide antigen assembly with MHC protein complex
en processing and presentation of endogenous antigen
dendritic cell differentiation
antigen processing and presentation
g and presentation of peptide antigen via MHC class Ib
modified amino acid metabolic process
ATP synthesis coupled electron transport
mitochondrial ATP synthesis coupled electron transport
oxidative phosphorylation
aerobic electron transport chain
respiratory electron transport chain
electron transport chain
proton motive force−driven ATP synthesis
roton motive force−driven mitochondrial ATP synthesis
aerobic respiration
cellular respiration
HMOCDaggle
ribonucleoprotein complex biogenesis
rRNA processing
rRNA metabolic process
ribosome biogenesis
mitochondrial translation
mitochondrial gene expression
protein−RNA complex assembly
protein−RNA complex organization
spliceosomal snRNP assembly
RNA splicing, via transesterification reactions
antigen processing and presentation of peptide antigen
antigen processing and presentation of exogenous antigen
antigen processing and presentation of exogenous peptide antigen
antigen processing and presentation via MHC class Ib
MHC protein complex assembly
peptide antigen assembly with MHC protein complex
antigen processing and presentation of endogenous antigen
antigen processing and presentation
antigen processing and presentation of peptide antigen via MHC class Ib
antigen processing and presentation of endogenous peptide antigen
antigen processing and presentation of peptide antigen via MHC class I
antigen processing and presentation of endogenous peptide antigen via MHC class I
regulation of T cell mediated cytotoxicity
response to bacterium
wound healing
cell killing
organic anion transport
external encapsulating structure organization
extracellular matrix organization
extracellular structure organization
collagen fibril organization
blood vessel development
positive regulation of response to external stimulus
blood vessel morphogenesis
HMOCDaggle
ribonucleoprotein complex biogenesis
glycoprotein metabolic process
glycoprotein biosynthetic process
protein O−linked glycosylation
homophilic cell−cell adhesion
monoatomic anion transport
lipid translocation
glycolipid metabolic process
liposaccharide metabolic process
monoatomic anion transmembrane transport
proteoglycan biosynthetic process
cilium organization
cilium assembly
double−strand break repair
microtubule−based movement
intraciliary transport
recombinational repair
DNA recombination
microtubule−based transport
ATP synthesis coupled electron transport
mitochondrial ATP synthesis coupled electron transport
oxidative phosphorylation
aerobic electron transport chain
respiratory electron transport chain
electron transport chain
aerobic respiration
cellular respiration
generation of precursor metabolites and energy
energy derivation by oxidation of organic compounds
HMOCDaggle
