Human_higher
GO Biological Process
ribonucleoprotein complex biogenesis
glycoprotein metabolic process
glycoprotein biosynthetic process
protein O−linked glycosylation
homophilic cell−cell adhesion
monoatomic anion transport
lipid translocation
glycolipid metabolic process
liposaccharide metabolic process
monoatomic anion transmembrane transport
proteoglycan biosynthetic process
cilium organization
cilium assembly
double−strand break repair
microtubule−based movement
intraciliary transport
recombinational repair
DNA recombination
microtubule−based transport
ATP synthesis coupled electron transport
mitochondrial ATP synthesis coupled electron transport
oxidative phosphorylation
aerobic electron transport chain
respiratory electron transport chain
electron transport chain
aerobic respiration
cellular respiration
generation of precursor metabolites and energy
energy derivation by oxidation of organic compounds
