KEGG Enrichment — Shared and Species−Specific DEGs
Adrenergic signaling in cardiomyocytes
Arrhythmogenic right ventricular cardiomyopathy
Basal cell carcinoma
Calcium signaling pathway
Cell adhesion molecule (CAM) interaction
Cell cycle
Complement and coagulation cascades
Coronavirus disease
Cytoskeleton in muscle cells
DNA replication
Diabetic cardiomyopathy
Dilated cardiomyopathy
Glycosaminoglycan biosynthesis − chondroitin sulfate / dermatan sulfate
Homologous recombination
Hormone signaling
Hypertrophic cardiomyopathy
IgSF CAM signaling
Integrin signaling
Neuroactive ligand signaling
Neuroactive ligand−receptor interaction
Non−alcoholic fatty liver disease
Oxidative phosphorylation
Prion disease
Protein digestion and absorption
Systemic lupus erythematosus
Thermogenesis
Wnt signaling pathway
cGMP−PKG signaling pathway
