All
GO Biological Process
ribonucleoprotein complex biogenesis
rRNA metabolic process
rRNA processing
antigen processing and presentation of peptide antigen
antigen processing and presentation of exogenous antigen
antigen processing and presentation of exogenous peptide antigen
antigen processing and presentation via MHC class Ib
MHC protein complex assembly
peptide antigen assembly with MHC protein complex
antigen processing and presentation of endogenous antigen
dendritic cell differentiation
antigen processing and presentation
antigen processing and presentation of peptide antigen via MHC class Ib
antigen processing and presentation of endogenous peptide antigen
regulation of syncytium formation by plasma membrane fusion
negative regulation of syncytium formation by plasma membrane fusion
regulation of myoblast fusion
cell killing
negative regulation of myoblast fusion
modified amino acid metabolic process
leukocyte mediated cytotoxicity
cytoplasmic translation
antigen processing and presentation of endogenous peptide antigen via MHC class I
regulation of cell killing
ATP synthesis coupled electron transport
mitochondrial ATP synthesis coupled electron transport
aerobic electron transport chain
oxidative phosphorylation
respiratory electron transport chain
electron transport chain
proton motive force−driven mitochondrial ATP synthesis
proton motive force−driven ATP synthesis
cellular respiration
aerobic respiration
