ein complex biogenesis
ribosome biogenesis
rRNA processing
RNA metabolic process
mRNA processing
ndrial gene expression
itochondrial translation
otein metabolic process
in biosynthetic process
ation of myoblast fusion
asma membrane fusion
ation of myoblast fusion
ulatory system process
amino acid transport
organic anion transport
organic acid transport
arboxylic acid transport
of membrane potential
onoatomic ion transport
blood circulation
n of metal ion transport
oss plasma membrane
mall subunit biogenesis
aturation of SSU−rRNA
cytoplasmic translation
rge subunit biogenesis
O−linked glycosylation
lipid metabolic process
ride metabolic process
e mediated cytotoxicity
terior axis specification
n of exogenous antigen
regulation of cell killing
regulation of cell killing
RNA splicing
omosome organization
romosome segregation
romosome segregation
DNA replication
chromatid segregation
DNA recombination
chromatid segregation
plated DNA replication
ble−strand break repair
asma membrane fusion
gamete generation
RNA metabolic process
cilium organization
cilium assembly
cell projection assembly
plasma membrane bounded cell projection assembly
negative regulation of myoblast fusion
negative regulation of syncytium formation by plasma membrane fusion
pattern specification process
regulation of myoblast fusion
microtubule−based movement
axoneme assembly
circulatory system process
blood circulation
animal organ morphogenesis
muscle structure development
heart development
renal system development
blood vessel development
skeletal system development
kidney development
extracellular matrix organization
actin filament organization
muscle cell development
muscle system process
striated muscle tissue development
striated muscle cell development
muscle tissue development
muscle cell differentiation
regulation of system process
endothelial cell migration
energy derivation by oxidation of organic compounds
generation of precursor metabolites and energy
aerobic respiration
cellular respiration
heart process
heart contraction
ATP metabolic process
cardiac muscle contraction
purine nucleoside triphosphate metabolic process
endomembrane system organization
purine ribonucleoside triphosphate metabolic process
regulation of muscle contraction
nucleoside triphosphate metabolic process
glyc
glycop

ein complex biogenesis
ribosome biogenesis
rRNA processing
RNA metabolic process
mRNA processing
ndrial gene expression
A complex organization
RNA complex assembly
itochondrial translation
esterification reactions
otein metabolic process
cilium organization
cilium assembly
axoneme assembly
motile cilium assembly
RNA catabolic process
acid catabolic process
ion of gene expression
RNA metabolic process
tRNA processing
tRNA modification
RNA splicing
egulation of translation
acid metabolic process
ribonucleoprotein complex biogenesis
ribosome biogenesis
rRNA processing
rRNA metabolic process
mRNA processing
mitochondrial gene expression
protein−RNA complex organization
protein−RNA complex assembly
mitochondrial translation
spliceosomal snRNP assembly
regulation of RNA stability
regulation of mRNA stability
regulation of mRNA catabolic process
mRNA stabilization
RNA stabilization
Rho protein signal transduction
ribonucleop
plasma membrane bounde
negative re
pa
re
re
cell migration involved
negati
regulation
reg
attachment of spindle m
