H_neg_C_pos
GO Biological Process
glycoprotein metabolic process
glycoprotein biosynthetic process
monoatomic cation homeostasis
monoatomic ion homeostasis
intracellular monoatomic cation homeostasis
response to endoplasmic reticulum stress
intracellular monoatomic ion homeostasis
intracellular chemical homeostasis
ERAD pathway
endoplasmic reticulum mannose trimming
regulation of RNA stability
regulation of mRNA stability
protein import into nucleus
import into nucleus
positive regulation of mRNA metabolic process
RNA catabolic process
regulation of mRNA catabolic process
epigenetic regulation of gene expression
RNA destabilization
nucleic acid catabolic process
blood vessel development
extracellular matrix organization
cytoplasmic translation
proteasome−mediated ubiquitin−dependent protein catabolic process
mitochondrion organization
protein polyubiquitination
regulation of transferase activity
protein K48−linked ubiquitination
regulation of kinase activity
regulation of protein kinase activity
blood vessel morphogenesis
angiogenesis
extracellular structure organization
external encapsulating structure organization
tissue remodeling
leukocyte migration
regulation of leukocyte migration
inflammatory response
