Both_neg
GO Biological Process
ribonucleoprotein complex biogenesis
ribosome biogenesis
rRNA processing
rRNA metabolic process
mRNA processing
mitochondrial gene expression
mitochondrial translation
glycoprotein metabolic process
glycoprotein biosynthetic process
negative regulation of myoblast fusion
negative regulation of syncytium formation by plasma membrane fusion
regulation of myoblast fusion
circulatory system process
amino acid transport
organic anion transport
organic acid transport
carboxylic acid transport
regulation of membrane potential
regulation of monoatomic ion transport
blood circulation
regulation of metal ion transport
import across plasma membrane
ribosomal small subunit biogenesis
maturation of SSU−rRNA
cytoplasmic translation
ribosomal large subunit biogenesis
protein O−linked glycosylation
glycolipid metabolic process
liposaccharide metabolic process
positive regulation of leukocyte mediated cytotoxicity
anterior/posterior axis specification
antigen processing and presentation of exogenous antigen
positive regulation of cell killing
regulation of cell killing
RNA splicing
chromosome organization
chromosome segregation
nuclear chromosome segregation
DNA replication
sister chromatid segregation
DNA recombination
mitotic sister chromatid segregation
DNA−templated DNA replication
double−strand break repair
regulation of syncytium formation by plasma membrane fusion
gamete generation
regulation of mRNA metabolic process
