
KEGG Enrichment Heatmap
DNA replication
Nucleocytoplasmic transport
Spliceosome
Mismatch repair
Homologous recombination
Cytoskeleton in muscle cells
Amyotrophic lateral sclerosis
Protein processing in endoplasmic reticulum
Oxidative phosphorylation
Huntington disease
Endocytosis
Ubiquitin mediated proteolysis
Prion disease
Alzheimer disease
Basal transcription factors
Parkinson disease
Cell cycle
Fanconi anemia pathway
ATP−dependent chromatin remodeling
mRNA surveillance pathway
Nucleotide excision repair
Base excision repair
Neuroactive ligand−receptor interaction
Neuroactive ligand signaling
Complement and coagulation cascades
Wnt signaling pathway
KEGG root term
Integrin signaling
Signaling pathways regulating pluripotency of stem cells
Calcium signaling pathway
ECM−receptor interaction
Tryptophan metabolism
