

KEGG Term

Vitamin D receptor signaling pathway
 Valine, leucine, and isoleucine degradation
 Transcription factor activity, sequence-specific
 Thyroid hormone receptor signaling pathway
 Taurine catabolic pathway
 SNARE vesicle trafficking
 Signaling pathways regulating cell growth and proliferation
 Rho-like signaling pathway
 Retrograde endoplasmic reticulum chaperone cycle
 Regulation of transcription
 Proximal tubule development
 Progesterone-mediated oocyte maturation
 Polyamine metabolism
 Phosphatidylcholine signaling
 PD-L1 expression pathway
 Pentose and glyoxylate pathways
 Pentose phosphate pathway
 Other types of glycolysis
 Nucleotide metabolism
 Neuroactive ligand-receptor interaction
 mRNA processing
 Metabolism of xenobiotics: Mycotoxins
 Longevity regulating pathway
 Leukocyte trans-endothelial migration
 Kaposi sarcoma-associated herpesvirus infection
 Inflammatory mediator metabolism
 Human T-cell leukemia virus type 1 infection
 Hippo signaling pathway
 Growth hormone synthesis and secretion
 Glycosaminoglycan biosynthesis
 Glucose catabolism
 Fructose and sucrose metabolism
 Folate biosynthesis
 Epithelial cell signaling in Helicobacter pylori
 Endocrine and other factor-regulated glucose homeostasis
 Drug metabolism
 Cytokine-cytokine receptor interaction
 Complement and coagulation cascades
 Chemical carcinogenesis
 Central carbon metabolism in cancer
 C-type lectin pathway
 Biosynthesis of arginine
 Bacterial invasion of the host cell and epithelial cell death
 ATP-dependent glucose transport
 Amino sugar and nucleoside metabolism
 AGE-RAGE signaling pathway in diabetic complications
 2-Oxocarboxylic acid metabolism

$-\log_{10}(p\text{-value})$
