

protein complex biogenesis	cytosome organization	glycocalyx
ribosome biogenesis	ribosome segregation	glycoprotein
rRNA processing	ribosome segregation	monomer
RNA metabolic process	DNA replication	monomer
mRNA processing	chromatid segregation	intracellular monomer
mitochondrial gene expression	DNA recombination	response to endoplasmic reticulum
protein complex organization	chromatid segregation	intracellular monomer
RNA complex assembly	chromatid segregation	intracellular monomer
mitochondrial translation	chromatid segregation	intracellular monomer
esterification reactions	chromatid segregation	intracellular monomer
protein metabolic process	chromatid segregation	intracellular monomer
cilium organization	chromatid segregation	intracellular monomer
cilium assembly	chromatid segregation	intracellular monomer
axoneme assembly	chromatid segregation	intracellular monomer
motile cilium assembly	chromatid segregation	intracellular monomer
RNA catabolic process	chromatid segregation	intracellular monomer
acid catabolic process	chromatid segregation	intracellular monomer
ion of gene expression	chromatid segregation	intracellular monomer
RNA metabolic process	chromatid segregation	intracellular monomer
tRNA processing	chromatid segregation	intracellular monomer
tRNA modification	chromatid segregation	intracellular monomer
RNA splicing	chromatid segregation	intracellular monomer
regulation of translation	chromatid segregation	intracellular monomer
acid metabolic process	chromatid segregation	intracellular monomer
protein complex biogenesis	ribonucleoprotein complex biogenesis	ribonucleoprotein
ribosome biogenesis	ribosome biogenesis	ribonucleoprotein
rRNA processing	rRNA processing	ribonucleoprotein
RNA metabolic process	rRNA metabolic process	ribonucleoprotein
mRNA processing	mRNA processing	ribonucleoprotein
mitochondrial gene expression	mitochondrial gene expression	ribonucleoprotein
protein complex organization	protein-RNA complex organization	ribonucleoprotein
RNA complex assembly	protein-RNA complex assembly	ribonucleoprotein
mitochondrial translation	mitochondrial translation	ribonucleoprotein
esterification reactions	spliceosomal snRNP assembly	ribonucleoprotein
protein metabolic process	regulation of RNA stability	ribonucleoprotein
cilium organization	regulation of mRNA stability	ribonucleoprotein
cilium assembly	regulation of mRNA catabolic process	ribonucleoprotein
axoneme assembly	mRNA stabilization	ribonucleoprotein
motile cilium assembly	RNA stabilization	ribonucleoprotein
RNA catabolic process	Rho protein signal transduction	ribonucleoprotein
acid catabolic process		ribonucleoprotein
ion of gene expression		ribonucleoprotein
RNA metabolic process		ribonucleoprotein
tRNA processing		ribonucleoprotein
tRNA modification		ribonucleoprotein
RNA splicing		ribonucleoprotein
regulation of translation		ribonucleoprotein
acid metabolic process		ribonucleoprotein
