

GO term	GO term	GO term
metabolic process	regulation of synaptic transmission, glutamatergic	neuron process
ribosomal translation		regulation of postsynaptic membrane potential
protein maturation		synaptic transmission
axon development	positive regulation of synaptic transmission, glutamatergic	synaptic transmission
axonogenesis		synaptic transmission
membrane potential		presynaptic transmission
synthetic process		bone tissue development
phosphorylation		regulation of presynaptic transmission
transport chain	synaptic transmission, glutamatergic	oxidative phosphorylation
transport chain		respiratory electron transport chain
electron transport		electron transport chain
electron transport	prostate gland development	ATP synthesis coupled to electron transport
transport chain		mitochondrial ATP synthesis coupled to electron transport
probiotic respiration		aerobic electron transport
matrix organization	urogenital system development	energy derivation by oxidation of organic compounds
ure organization		generation of precursor metabolites and energy
ure organization		
metabolic process	ribonucleoprotein complex biogenesis	ribonucleoprotein complex biogenesis
synthetic process	ribosome biogenesis	ribosome biogenesis
mannosylation	rRNA metabolic process	ribosome biogenesis
mannosylation	rRNA processing	ribosome biogenesis
mannose trimming		rRNA processing
ion homeostasis	mitochondrial gene expression	rRNA processing
deglycosylation	mitochondrial translation	mitochondrial translation
metabolic process		mitochondrial translation
ion homeostasis	mRNA processing	mitochondrial translation
membrane transport	RNA splicing	mitochondrial translation
leukocyte migration	RNA splicing, via transesterification reactions	mitochondrial translation
leukocyte migration	RNA splicing, via transesterification reactions with bulged adenosine as nucleophile	mitochondrial translation
chemotaxis		mitochondrial translation
taxis	sulfur compound metabolic process	protein alpha-1,2-mannosidase
matrix organization	organic anion transport	protein alpha-1,2-mannosidase
mechanical stimulus	amide metabolic process	endoplasmic reticulum protein
external stimulus	organic acid transport	endoplasmic reticulum protein
cell migration	carboxylic acid transport	chondroitin sulfate proteoglycan
cell link formation	oxidative phosphorylation	chondroitin sulfate proteoglycan
um ion transport		
mediated signaling		
phosphorylation		
transport chain		
transport chain		
electron transport		
electron transport		
transport chain		
cellular respiration		
matrix organization		
ure organization		
ure organization
