intracellular transport
establishment of localization in cell
cellular localization
protein metabolic process
Golgi vesicle transport
modification−dependent macromolecule catabolic process
modification−dependent protein catabolic process
ubiquitin−dependent protein catabolic process
protein catabolic process
proteasomal protein catabolic process
myofibril assembly
striated muscle contraction
regulation of blood circulation
muscle contraction
muscle system process
heart contraction
heart process
regulation of heart contraction
blood circulation
negative regulation of wound healing
fibrinolysis
heart growth
regulation of organ growth
cardiac muscle cell proliferation
positive regulation of heart growth
positive regulation of cardiac muscle cell proliferation
regulation of cardiac muscle cell proliferation
regulation of cardiac muscle tissue growth
regulation of heart growth
connective tissue development
skeletal system development
epithelium development
tissue development
cell differentiation
cellular developmental process
regulation of multicellular organismal process
anatomical structure formation involved in morphogenesis
circulatory system development
multicellular organismal process
developmental process
multicellular organism development
animal organ morphogenesis
anatomical structure development
anatomical structure morphogenesis
system development
system process
neurogenesis
nervous system development
nucleic acid metabolic process
nucleic acid biosynthetic process
RNA metabolic process
RNA biosynthetic process
gene expression
regulation of RNA metabolic process
regulation of DNA−templated transcription
regulation of nucleobase−containing compound metabolic process
nucleobase−containing compound metabolic process
nucleobase−containing compound biosynthetic process
DNA repair
DNA metabolic process
DNA damage response
DNA replication
regulation of DNA metabolic process
DNA recombination
double−strand break repair
recombinational repair
cell cycle
chromosome organization
cell cycle process
chromosome segregation
organelle fission
nuclear division
nuclear chromosome segregation
mitotic cell cycle process
cell division
mitotic cell cycle
