tricarboxylic acid metabolic process
tricarboxylic acid cycle
system process
synaptic signaling via neuropeptide
sensory perception
nervous system process
isocitrate metabolic process
humoral immune response mediated by circulating immunoglobulin
humoral immune response
detection of stimulus involved in sensory perception
detection of stimulus
detection of mechanical stimulus
detection of external stimulus
detection of chemical stimulus involved in sensory perception
complement activation, classical pathway
complement activation
cerebellar granule cell differentiation
cerebellar granular layer formation
