xenobiotic metabolic process
T cell receptor V(D)J recombination
somatic recombination of T cell receptor gene segments
somatic diversification of T cell receptor genes
RNA metabolic process
RNA biosynthetic process
respiratory electron transport chain
regulation of nucleobase−containing compound metabolic process
primary metabolic process
peptide antigen assembly with MHC protein complex
peptide antigen assembly with MHC class II protein complex
oxidative phosphorylation
nucleobase−containing compound metabolic process
nucleobase−containing compound biosynthetic process
nucleic acid metabolic process
nucleic acid biosynthetic process
monoatomic ion transport
monoatomic ion transmembrane transport
monoatomic cation transport
modified amino acid metabolic process
mitochondrial ATP synthesis coupled electron transport
MHC protein complex assembly
MHC class II protein complex assembly
macromolecule metabolic process
macromolecule biosynthetic process
electron transport chain
cell surface receptor signaling pathway
ATP synthesis coupled electron transport
antigen processing and presentation of peptide antigen via MHC class II
antigen processing and presentation of peptide antigen
antigen processing and presentation of exogenous peptide antigen
antigen processing and presentation of exogenous antigen
antigen processing and presentation of endogenous peptide antigen via MHC class I
antigen processing and presentation of endogenous peptide antigen
aerobic electron transport chain
