GO:BP Enrichment Heatmap
antigen processing and presentation of peptide antigen
antigen processing and presentation of endogenous peptide antigen
antigen processing and presentation of exogenous peptide antigen
peptide antigen assembly with MHC protein complex
MHC protein complex assembly
antigen processing and presentation of exogenous antigen
antigen processing and presentation of peptide antigen via MHC class II
antigen processing and presentation of endogenous peptide antigen via MHC class I
peptide antigen assembly with MHC class II protein complex
MHC class II protein complex assembly
xenobiotic metabolic process
modified amino acid metabolic process
somatic diversification of T cell receptor genes
T cell receptor V(D)J recombination
somatic recombination of T cell receptor gene segments
respiratory electron transport chain
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
monoatomic ion transport
oxidative phosphorylation
monoatomic ion transmembrane transport
monoatomic cation transport
cell surface receptor signaling pathway
aerobic electron transport chain
electron transport chain
regulation of nucleobase−containing compound metabolic process
primary metabolic process
macromolecule biosynthetic process
nucleobase−containing compound metabolic process
nucleobase−containing compound biosynthetic process
nucleic acid metabolic process
RNA metabolic process
macromolecule metabolic process
nucleic acid biosynthetic process
RNA biosynthetic process
