Sulfur metabolism
PPAR signaling pathway
Neutrophil extracellular trap formation
Metabolism of xenobiotics by cytochrome P450
Maturity onset diabetes of the young
Hepatocellular carcinoma
Glycosphingolipid biosynthesis − globo and isoglobo series
Drug metabolism − cytochrome P450
Complement and coagulation cascades
Chemical carcinogenesis − DNA adducts
Arginine and proline metabolism
KEGG Term
clust2
Cluster
−log10(p−value)
