KEGG Enrichment Heatmap
Type I diabetes mellitus
Graft−versus−host disease
Allograft rejection
Autoimmune thyroid disease
Diabetic cardiomyopathy
Oxidative phosphorylation
Mitophagy − animal
Insulin signaling pathway
Ubiquitin mediated proteolysis
Nucleocytoplasmic transport
mRNA surveillance pathway
Autophagy − animal
Protein processing in endoplasmic reticulum
Spliceosome
Cell cycle
ATP−dependent chromatin remodeling
Coronavirus disease − COVID−19
Ribosome
Antigen processing and presentation
Phagosome
Asthma
Viral myocarditis
Complement and coagulation cascades
Chemical carcinogenesis − DNA adducts
Thermogenesis
Chemical carcinogenesis − reactive oxygen species
Non−alcoholic fatty liver disease
Pathways in cancer
Cytokine−cytokine receptor interaction
Retrograde endocannabinoid signaling
Cytoskeleton in muscle cells
Parkinson disease
