trans−synaptic signaling
system development
sphingolipid biosynthetic process
sodium ion transmembrane transport
regulation of biological quality
proteoglycan metabolic process
proteoglycan biosynthetic process
protein O−linked glycosylation via xylose
multicellular organismal process
monoatomic ion transport
monoatomic ion transmembrane transport
monoatomic cation transport
monoatomic cation transmembrane transport
metal ion transport
glycoprotein metabolic process
chemical synaptic transmission
cell adhesion
cell−cell adhesion
carbohydrate derivative metabolic process
carbohydrate derivative biosynthetic process
anterograde trans−synaptic signaling
