KEGG Term
Virion − Flavivirus and Alphavirus
Ubiquinone and other terpenoid−quinone biosynthesis
Starch and sucrose metabolism
Staphylococcus aureus infection
Rheumatoid arthritis
Regulation of lipolysis in adipocytes
Phosphonate and phosphinate metabolism
p53 signaling pathway
Other types of O−glycan biosynthesis
Olfactory transduction
Nicotinate and nicotinamide metabolism
Neuroactive ligand−receptor interaction
Neomycin, kanamycin and gentamicin biosynthesis
Mucin type O−glycan biosynthesis
Morphine addiction
Metabolic pathways
Mannose type O−glycan biosynthesis
Malaria
Intestinal immune network for IgA production
Integrin signaling
Inflammatory bowel disease
Hypertrophic cardiomyopathy
Homologous recombination
Glycosphingolipid biosynthesis − ganglio series
Galactose metabolism
GABAergic synapse
Folate biosynthesis
Dilated cardiomyopathy
D−Amino acid metabolism
Complement and coagulation cascades
Chemokine signaling pathway
Central carbon metabolism in cancer
Carbon metabolism
cAMP signaling pathway
Biotin metabolism
Biosynthesis of cofactors
Amoebiasis
clust2
Cluster
−log10(p−value)
