clust0_Changes : multicellular organismal process
clust0_Changes : system development
clust0_Changes : anatomical structure development
clust1_Changes : nucleic acid metabolic process
clust1_Changes : RNA metabolic process
clust1_Changes : macromolecule metabolic process
clust1_HigherH : nucleobase−containing compound biosynthetic process
clust1_HigherH : nucleic acid biosynthetic process
clust1_HigherH : RNA metabolic process
clust3_Changes : multicellular organismal process
clust3_Changes : cell adhesion
clust3_Changes : response to wounding
clust4_Changes : multicellular organismal process
clust4_Changes : cell adhesion
clust4_Changes : proteoglycan biosynthetic process
clust4_HigherH : negative regulation of phagocytosis
clust4_HigherH : cellular response to interleukin−12
clust4_HigherH : response to interleukin−12
clust5_Changes : chemotaxis
clust5_Changes : G protein−coupled receptor signaling pathway
clust5_Changes : taxis
clust5_HigherC : antigen processing and presentation of peptide antigen
clust5_HigherC : antigen processing and presentation
clust5_HigherC : antigen processing and presentation of exogenous peptide antigen
clust5_HigherH : cytoplasmic translation
