GO:BP Enrichment Heatmap
antigen processing and presentation of peptide antigen
antigen processing and presentation of endogenous peptide antigen
antigen processing and presentation of exogenous antigen
antigen processing and presentation of peptide antigen via MHC class II
peptide antigen assembly with MHC protein complex
MHC protein complex assembly
MHC class II protein complex assembly
peptide antigen assembly with MHC class II protein complex
antigen processing and presentation
antigen processing and presentation of exogenous peptide antigen
multicellular organismal process
vasculature development
signaling
cell communication
regulation of multicellular organismal process
positive regulation of nervous system development
locomotion
cell migration
cell motility
developmental process
anatomical structure morphogenesis
system development
multicellular organism development
anatomical structure development
proteoglycan biosynthetic process
homophilic cell−cell adhesion
proteoglycan metabolic process
cell adhesion
cell−cell adhesion
G protein−coupled receptor signaling pathway
taxis
chemotaxis
positive regulation of cell motility
positive regulation of locomotion
response to wounding
regulation of leukocyte migration
positive regulation of phosphate metabolic process
positive regulation of phosphorus metabolic process
cytoplasmic translation
chromosome organization
negative regulation of phagocytosis
cellular response to interleukin−12
response to interleukin−12
nucleic acid metabolic process
RNA metabolic process
nucleic acid biosynthetic process
RNA biosynthetic process
nucleobase−containing compound metabolic process
macromolecule metabolic process
regulation of primary metabolic process
primary metabolic process
nucleobase−containing compound biosynthetic process
regulation of nucleobase−containing compound metabolic process
transcription by RNA polymerase II
regulation of RNA metabolic process
DNA−templated transcription
