tRNA N1−guanine methylation
tRNA modification
tRNA methylation
secretory granule localization
RNA modification
positive regulation of nucleotide−binding oligomerization domain containing 2 signaling pathway
positive regulation of nucleotide−binding domain, leucine rich repeat containing receptor signaling pathway
positive regulation of keratinocyte apoptotic process
positive regulation of insulin secretion involved in cellular response to glucose stimulus
positive regulation of epithelial cell apoptotic process
positive regulation of B cell differentiation
N−acetylglucosamine catabolic process
macromolecule methylation
dense core granule transport
dense core granule localization
dense core granule cytoskeletal transport
anterograde neuronal dense core vesicle transport
