GO Term
xenobiotic metabolic process
vitamin B metabolic process
tRNA wobble position uridine thiolation
trigeminal sensory neuron development
transmembrane transport
transcytosis
telomeric loop assembly
telomere maintenance via telomere trimming
synaptic assembly at neuromuscular junction
superoxide metabolic process
substance P catabolic process
suckling behavior
stereocilium bundle organization
spermidine metabolic process
spermidine catabolic process
skeletal muscle tissue development
single stranded viral RNA replication via double stranded DNA intermediate
sensory perception of mechanical stimulus
selenocysteine metabolic process
roof of mouth development
ribonucleoside bisphosphate metabolic process
retina homeostasis
resolution of mitotic recombination intermediates
resolution of meiotic recombination intermediates
relaxation of vascular smooth muscle
relaxation of smooth muscle
regulation of synapse assembly
regulation of superoxide anion generation
regulation of single stranded viral RNA replication via double stranded DNA intermediate
regulation of response to endoplasmic reticulum stress
regulation of regulated secretory pathway
regulation of protein targeting
regulation of nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
regulation of neutrophil activation
regulation of muscle cell differentiation
regulation of monoatomic anion transport
regulation of meiotic nuclear division
regulation of mesenchymal cell apoptotic process
regulation of glycine import across plasma membrane
regulation of exocytosis
regulation of developmental pigmentation
regulation of basement membrane organization
regulation of adenylate cyclase−inhibiting adrenergic receptor signaling pathway
receptor localization to synapse
reactive nitrogen species metabolic process
reactive oxygen species biosynthetic process
radial glia−guided pyramidal neuron migration
pyruvate transmembrane transport
pyruvate metabolic process
purine ribonucleoside bisphosphate metabolic process
purine nucleoside bisphosphate metabolic process
protein localization to plasma membrane
protein localization to ciliary membrane
protein localization to cell surface
protein insertion into ER membrane by stop−transfer membrane−anchor sequence
protein localization to adherens junction
principal sensory nucleus of trigeminal nerve development
primary amine metabolic process
potassium ion transmembrane transport
post−embryonic animal morphogenesis
post−embryonic animal organ morphogenesis
positive regulation of transferase activity
positive regulation of synapse assembly
positive regulation of spindle checkpoint
positive regulation of regulated secretory pathway
positive regulation of protein targeting to membrane
positive regulation of phagocytosis
positive regulation of myeloid leukocyte mediated immunity
positive regulation of mitotic cell cycle spindle assembly checkpoint
positive regulation of meiotic nuclear division
positive regulation of intrinsic apoptotic signaling pathway by p53 class mediator
positive regulation of integrin−mediated signaling pathway
positive regulation of defense response to bacterium
positive regulation of cardiac muscle cell proliferation
positive regulation of calcium ion transmembrane transport
polyamine metabolic process
paranodal junction assembly
pallium development
odontogenesis of dentin−containing tooth
nucleoside bisphosphate metabolic process
nitric oxide biosynthetic process
neutrophil activation involved in immune response
neutrophil degranulation
neuropeptide processing
neurofilament cytoskeleton organization
negative regulation of synapse assembly
negative regulation of single stranded viral RNA replication via double stranded DNA intermediate
negative regulation of nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
negative regulation of muscle cell differentiation
negative regulation of glycine import across plasma membrane
negative regulation of exocytosis
negative regulation of cytoplasmic translation
negative regulation of cell growth involved in cardiac muscle cell development
negative regulation of branched−chain amino acid transport
negative regulation of amine metabolic process
NAD+ biosynthetic process
myeloid leukocyte migration
myeloid cell activation involved in immune response
molybdopterin cofactor metabolic process
molybdopterin cofactor biosynthetic process
Mo−molybdopterin cofactor metabolic process
Mo−molybdopterin cofactor biosynthetic process
mesenchymal cell apoptotic process
maternal process involved in female pregnancy
maintenance of protein location in cell
long−term synaptic potentiation
limb development
leukocyte migration involved in inflammatory response
leukocyte degranulation
lactate transmembrane transport
lactam metabolic process
L−ornithine transmembrane transport
L−lysine transmembrane transport
L−arginine transmembrane transport
L−arginine import across plasma membrane
intracellular potassium ion homeostasis
inhibition of neuroepithelial cell differentiation
histamine catabolic process
hemidesmosome assembly
glycoside metabolic process
glycine import across plasma membrane
GDP−mannose metabolic process
GDP−mannose biosynthetic process
formation of extracellular matrix
ether metabolic process
ether biosynthetic process
ethanol metabolic process
establishment or maintenance of transmembrane electrochemical gradient
establishment of protein localization to endosome
embryonic hindgut morphogenesis
double−strand break repair via synthesis−dependent strand annealing
DNA cytosine deamination
detection of mechanical stimulus involved in sensory perception of sound
creatine metabolic process
clearance of foreign intracellular nucleic acid
ciliary neurotrophic factor−mediated signaling pathway
central nervous system neuron development
cellular response to UV−A
cellular response to nitric oxide
cell surface receptor signaling pathway involved in heart development
cell adhesion mediated by integrin
cartilage condensation
cardiac muscle cell development
carboxylic acid transmembrane transport
brainstem development
bradykinin metabolic process
biogenic amine metabolic process
base conversion or substitution editing
apelin receptor signaling pathway
angiotensin maturation
amyloid−beta clearance by cellular catabolic process
amyloid−beta clearance
amino acid transmembrane transport
amino acid import across plasma membrane
amine metabolic process
adenylate cyclase−inhibiting adrenergic receptor signaling pathway
activation of phospholipase C activity
3'−phosphoadenosine 5'−phosphosulfate metabolic process
